13. Which of the following is an external factor that influences perception?

- a. Needs
- b. Status
- c. Personality
- d. Experiences

**Ans: b. Status**

14. Which one is NOT an external factor that influences perception?

- a. Size
- b. Status
- c. Intensity
- d. Personality

**Ans: d. Personality**

15. What is an important first step in improving your perception of a situation?

- a. Jumping to conclusions
- b. Gathering all relevant information
- c. Trusting your first impression
- d. Ignoring context

**Ans: b. Gathering all relevant information**

16. Which of the following describes the impact of knowledge on perception?

- a. It has no effect on perception.
- b. It can constantly influence and improve perception.
- c. It always confuses perception.
- d. It makes perception more random.

**Ans: b. It can constantly influence and improve perception.**

17. Positive experiences are likely to \_\_\_\_\_.

- a. decrease one's self-confidence
- b. improve perception
- c. has no effect on perception
- d. confuses one's understanding of a situation

**Ans: b. improve perception**

- a. focus solely on negative experiences
- b. ignore the influence of knowledge
- c. continuously seek knowledge
- d. rely only on past experiences

**Ans: c. continuously seek knowledge**

19. The effect of failure on perception is often to \_\_\_\_\_.

- a. boosts confidence
- b. has no impact on confidence
- c. decreases self-confidence
- d. improves perception by providing clear feedback

**Ans: c. decreases self-confidence**

20. How does the size of an object affect its perception?

- a. Smaller objects are generally more noticeable.
- b. Larger objects are often more noticeable.
- c. The size of an object has no impact on perception.
- d. Size only affects the color of the object.

**Ans: b. Larger objects are often more noticeable.**

21. A high-status person or thing is typically perceived as \_\_\_\_\_.

- a. less important
- b. more valuable
- c. unnoticeable
- d. irrelevant

**Ans: b. more valuable**

22. What happens to lower intensity stimuli?

- a. They are more likely to be noticed immediately.
- b. They become memorable.
- c. They are less likely to capture attention.
- d. They are perceived more vividly.

**Ans: c. They are less likely to capture attention**

23. In terms of perception, how do people generally react to moving stimuli?

- They react less to moving stimuli.
- They ignore moving stimuli.
- They pay more attention to moving stimuli.
- They react the same way to both moving and stationary stimuli.

**Ans: c. They pay more attention to moving stimuli.**

24. Which type of object is generally more likely to grab attention?

- Stationary objects
- Moving objects
- Both stationary and moving objects equally
- Rest position

**Ans: b. Moving objects**

25. Perception comes across \_\_\_\_\_.

- only physical objects
- objects, events, people, and information
- only visual stimuli
- only auditory stimuli

**Ans: b. objects, events, people, and information**

26. Which of the following is NOT a source of input for perception?

- Internal sources
- External sources
- Random guesses
- Sensory stimuli

**Ans: c. Random guesses**

27. What is the term used to describe the ultimate behavior of an action?

- Input
- Process
- Output
- Feedback

**Ans: c. Output**
