Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

1. What is a user account in Windows?

- A. Hardware device
- B. Personal settings for a user
- C. Antivirus software
- D. System file

Ans: B. Personal settings for a user

Explanation: A user account stores personal files, settings, and preferences.

2. Which type of account has full control over the system?

- A. Guest
- B. Standard user
- C. Administrator
- D. Network user

Ans: C. Administrator

Explanation: The Administrator account can install software and change system settings.

3. Which Windows tool is used to manage user accounts?

- A. Task Manager
- B. Control Panel
- C. File Explorer
- D. Command Prompt

Ans: B. Control Panel

Explanation: User accounts can be managed through Control Panel or Settings.

IT Support and Development Training Programme

Creating Employable Engineers and Entrepreneurs

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

4. Which option allows creating a new user account?

- A. Network settings
- B. User Accounts
- C. System Restore
- D. Windows Update

Ans: B. User Accounts

Explanation: New user accounts are created using the User Accounts option.

5. What is a Guest account used for?

- A. Full system control
- B. Temporary user access
- C. Software installation
- D. Network configuration

Ans: B. Temporary user access

Explanation: Guest accounts provide limited access for temporary users.

6. What is the purpose of a password?

- A. Increase speed
- B. Protect the user account
- C. Connect to the internet
- D. Install Windows

Ans: B. Protect user account

Explanation: Passwords secure user accounts from unauthorized access.

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

7. Which option is used to change a user's password?

- A. Device Manager
- B. User Accounts
- C. Disk Cleanup
- D. Task Scheduler

Ans: B. User Accounts

Explanation: Passwords can be changed in the User Accounts settings.

8. What is a Microsoft account?

- A. Local user account
- B. Online account used with Windows
- C. Hardware account
- D. Network cable

Ans: B. Online account used with Windows

Explanation: Microsoft accounts sync settings and data online.

9. Which feature allows switching users without logging out?

- A. Restart
- B. Sleep
- C. Switch User
- D. Shut Down

Ans: C. Switch User

Explanation: Switch User allows changing users without closing programs.

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

10. What is a User Profile?

- A. Hardware settings
- B. Folder containing user data
- C. Internet connection
- D. Antivirus file

Ans: B. Folder containing user data

Explanation: User profile stores documents, pictures, and settings.

11. What is Internet configuration?

- A. Installing Windows
- B. Setting up the internet connection
- C. Formatting disk
- D. Creating a user account

Ans: B. Setting up an internet connection

Explanation: Internet configuration enables the system to access the internet.

12. Which device connects a computer to the internet?

- A. Scanner
- B. Printer
- C. Modem
- D. Speaker

Ans: C. Modem

Explanation: A modem connects the computer to the internet service.

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

13. Which device distributes the internet to multiple devices?

- A. Modem
- B. Router
- C. Switch
- D. Monitor

Ans: B. Router

Explanation: The router shares the internet connection among devices.

14. Which Windows setting is used to configure the Internet?

- A. Display
- B. Personalization
- C. Network & Internet
- D. Update & Security

Ans: C. Network & Internet

Explanation: Internet settings are configured under Network & Internet.

15. Which type of connection uses cables?

- A. Wi-Fi
- B. Bluetooth
- C. Wired connection
- D. Hotspot

Ans: C. Wired connection

Explanation: Wired connections use Ethernet cables.

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

16. Which type of internet connection is wireless?

- A. LAN
- B. Ethernet
- C. Wi-Fi
- D. USB

Ans: C. Wi-Fi

Explanation: Wi-Fi connects devices wirelessly.

17. What is an IP address?

- A. Computer name
- B. Internet password
- C. Unique address of a device
- D. Software license

Ans: C. Unique address of a device

Explanation: An IP address identifies devices on a network.

18. Which protocol is used for web browsing?

- A. FTP
- B. HTTP
- C. SMTP
- D. POP

Ans: B. HTTP

Explanation: HTTP is used to access websites.

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

19. What does HTTPS indicate?

- A. Fast internet
- B. Secure website
- C. Offline website
- D. Large website

Ans: B. Secure website

Explanation: HTTPS ensures secure data transfer.

20. Which browser comes pre-installed with Windows?

- A. Chrome
- B. Firefox
- C. Microsoft Edge
- D. Opera

Ans: C. Microsoft Edge

Explanation: Microsoft Edge is the default Windows browser.

21. What is a Wi-Fi password used for?

- A. Install software
- B. Secure network access
- C. Create a user account
- D. Update Windows

Ans: B. Secure network access

Explanation: Wi-Fi password prevents unauthorized access.

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

22. What is Network Troubleshooter used for?

- A. Virus removal
- B. Fix internet problems
- C. Install drivers
- D. Format disk

Ans: B. Fix internet problems

Explanation: Network Troubleshooter helps solve connectivity issues.

23. What is a hotspot?

- A. Virus
- B. Shared internet connection
- C. Software update
- D. Firewall

Ans: B. Shared internet connection

Explanation: A hotspot shares the internet with other devices.

24. Which setting shows connected networks?

- A. Control Panel
- B. Task Manager
- C. Network & Internet
- D. File Explorer

Ans: C. Network & Internet

Explanation: Connected networks are shown in Network settings.

Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

25. What happens when the internet is disconnected?

- A. The computer stops working
- B. Online services are unavailable
- C. Files are deleted
- D. Windows shuts down

Ans: B. Online services are unavailable

Explanation: Internet-dependent services will not work.

26. Which icon shows network status on the taskbar?

- A. Battery icon
- B. Speaker icon
- C. Network icon
- D. Clock

Ans: C. Network icon

Explanation: The network icon displays the internet connection status.

27. User configuration in Windows is used to manage what?

- A. Hardware devices
- B. User accounts and personal settings
- C. Booting process
- D. Disk partitions

Ans: B. User accounts and personal settings

Explanation: User configuration controls accounts, permissions, and user preferences.

28. Which user account has limited access in Windows?

- A. Administrator
- B. Guest
- C. Power user
- D. Root

Ans: B. Guest

Explanation: The guest account is meant for temporary use with limited permissions.

29. Where can user accounts be managed in Windows?

- A. Task Manager
- B. Settings → Accounts
- C. File Explorer
- D. Control Panel only

Ans: B. Settings → Accounts

Explanation: User accounts are added, removed, and modified from Accounts settings.

30. Which Windows feature is used to control children's activity?

- A. Firewall
- B. Parental controls
- C. Task Scheduler
- D. Disk Management

Ans: B. Parental controls

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

Explanation: Parental controls restrict usage and access for children.

31. Which type of internet connection uses a cable?

- A. Wi-Fi
- B. Ethernet
- C. Bluetooth
- D. Hotspot

Ans: B. Ethernet

Explanation: Ethernet provides a wired internet connection.

32. Which service automatically assigns IP addresses?

- A. DNS
- B. DHCP
- C. Proxy
- D. Firewall

Ans: B. DHCP

Explanation: DHCP assigns IP addresses automatically.

33. Which account type cannot install most software?

- A. Administrator
- B. Standard user
- C. Root
- D. Super user

Ans: B. Standard user

Explanation: Standard users have limited permissions.

34. Which network type is best for home use?

- A. Public network
- B. Private network
- C. Open network
- D. Proxy network

Ans: B. Private network

Explanation: A private network allows device discovery at home.

35. Which icon shows available Wi-Fi networks?

- A. Battery icon
- B. Network icon
- C. Volume icon
- D. Update icon

Ans: B. Network icon

Explanation: The network icon displays available internet connections.

36. Which shortcut opens Windows Settings directly?

- A. Alt + F4
- B. Windows + I
- C. Ctrl + Esc
- D. Windows + D

Ans: B. Windows + I

Explanation: Windows + I opens the Settings app, where user accounts and internet settings can be managed.

37. Which shortcut opens the Task Manager?

- A. Ctrl + Shift + Esc
- B. Windows + L
- C. Alt + F4
- D. Windows + E

Ans: A. Ctrl + Shift + Esc

Explanation: Task Manager shows running apps and allows managing user sessions.

38. Which shortcut opens the Network settings quickly?

- A. Windows + A
- B. Windows + I → Network & Internet
- C. Ctrl + N
- D. Windows + R → cmd

Ans: B. Windows + I → Network & Internet

Explanation: Windows + I opens Settings, from where network and internet options are accessed.

39. Which shortcut opens the Run dialog box?

- A. Windows + R
- B. Ctrl + R
- C. Alt + R
- D. Windows + E

Ans: A. Windows + R

Explanation: Run dialog allows direct access to user accounts and network commands.

40. Which shortcut shows the Windows Quick Access menu including Network Connections?

- A. Windows + X
- B. Ctrl + X
- C. Alt + X
- D. Windows + E

Ans: A. Windows + X

Explanation: Opens the Quick Access menu to access Control Panel, Device Manager, and Network Connections.

41. Which shortcut opens the Control Panel to manage accounts?

- A. Windows + R → type control
- B. Ctrl + P
- C. Windows + C
- D. Windows + I → Control Panel

Ans: A. Windows + R → type control

Explanation: Run dialog can open the Control Panel for managing users and network settings.

Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

42. Which shortcut allows switching between user accounts quickly?

- A. Ctrl + Alt + Del → Switch user
- B. Alt + Tab
- C. Windows + L
- D. Windows + Tab

Ans: A. Ctrl + Alt + Del → Switch user

Explanation: Ctrl + Alt + Del gives the option to lock, log out, or switch users.

43. Shortcut to open Network Connections window_____.

- A. Windows + R → ncpa.cpl
- B. Windows + N
- C. Ctrl + N
- D. Windows + I → Network

Ans: A. Windows + R → ncpa.cpl

Explanation: Shows all network adapters and connection properties.

44. Shortcut to open Device Manager_____.

- A. Windows + X → Device Manager
- B. Ctrl + D
- C. Windows + R → devmgmt.msc
- D. Both A & C

Ans: D. Both A & C

Explanation: Device Manager can be opened via the Quick Access menu or the Run dialog.

Name of the Bundle	Advanced Bundle V2	Subject	System Administration
Topic	Windows OS (User configuration, Internet configuration)	Last updated on	05 March 2026

45. Which Run command opens Network Connections?

- A. ncpa.cpl
- B. control userpasswords2
- C. inetctl.cpl
- D. compmgmt.msc

Ans: A. ncpa.cpl

Explanation: Shows all network adapters and their properties (Ethernet, Wi-Fi).

46. Which Run command opens Device Manager?

- A. devmgmt.msc
- B. compmgmt.msc
- C. inetctl.cpl
- D. msconfig

Ans: A. devmgmt.msc

Explanation: Device Manager shows all installed hardware and driver information.

47. Which Run command opens Local Users and Groups management?

- A. lusrmgr.msc
- B. control userpasswords2
- C. inetctl.cpl
- D. services.msc

Ans: A. lusrmgr.msc

Explanation: Allows adding, deleting, or modifying local user accounts and groups.

48. Which Run command opens System Configuration (Boot options)?

- A. msconfig
- B. ncpa.cpl
- C. inetcp.cpl
- D. compmgmt.msc

Ans: A. msconfig

Explanation: Used to configure startup programs, services, and boot options.

49. Which keyboard shortcut opens the Quick Access menu in Microsoft Windows?

- A. Windows + X
- B. Ctrl + X
- C. Alt + X
- D. Windows + E

Ans: A. Windows + X

Explanation: The Windows + X shortcut opens the Power User Menu (Quick Access Menu) in Microsoft Windows such as Windows 10 and Windows 11.
